Ground Modular Concept / Vehicle Modular Concept / Navy Modular Concept

## MMG Mount

The Fjord Defence MMG Mount is designed to provide a stable platform for accurate firing of either the Mag58/M240 Medium Machine Gun or the Minimi/M249 Light Machine Gun from vehicles, RHIB's or boats.

The integrated recoil mitigation system reduces the peak forces acting on the platform and result in a consistent high hit probability.

Both the center of elevation and the sliding system with recoil damping are placed in the line of bore to ensure best possible stability and accuracy.

The brass and link collector bag hinder flow of brass/link into the vehicle hatch or on deck floor.

All surfaces are treated according to military standards for corrosion protection.

## Technical Specifications

### Description:

MMG Mount with integrated recoil damping fits all M240 variants.

conditions. The MMG Mount has 60° elevation and 40° depression and narrow design gives a large range of motion.

STANREC 4796 pintle interface. Adjustable depression limiter with 1° resolution.

Holder for different types of ammunition boxes (M2A1 –400 rounds, M19A1 –200 rounds) and holder 5,56 standard plastic box.

### Specification

### Data

Weight [depending on equipment]

<6 kg

Dimensions H x L x W [mm]:

310 x 335 x 319

Material

Stainless steel

Surface treatment

Black Oxidized MIL-DTL-13924

Environmental design

MIL-STD-810 G, STANAG 2895, A1-A3, B1-B2, C0-C2
